Cephalopods	7
Crustaceans	8
Bivalves	10
Salmon/Trout	10
Freshwater fish	10
Non Traditional Species	11
Seabass	12
Seabream	13

LATEST TRENDS

Going into 2007, European import price trends as reported by correspondents appear broadly stable compared to indications at the end of 2006. No significant changes are reported for frozen groundfish fillet prices while seasonally weak activity in key pelagic markets mean limited price changes for frozen round mackerel or herring this month. Some upward price movement is indicated for frozen tuna products, notably yellowfin, due to a continued weak supply situation. On the other hand, a negative trend is evident in some farmed fish markets with weaker prices reported for seabass and for larger sizes of seabream and turbot.

GROUNDFISH

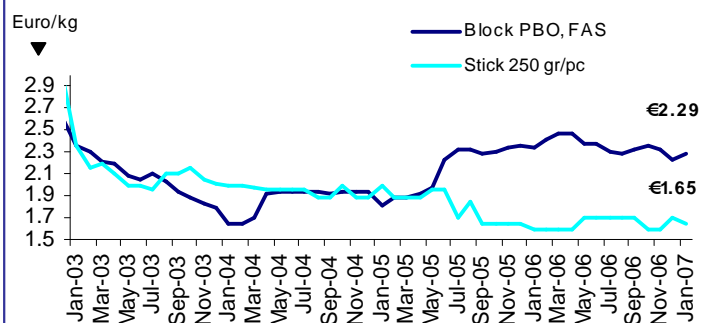

The stability in Alaska pollock fillet prices noted during the fourth quarter has continued into the new year. Boneless fillet blocks delivered Europe continue to be quoted at just under

US\$3000/tonne for product of US origin with Russian product around US\$100/tonne

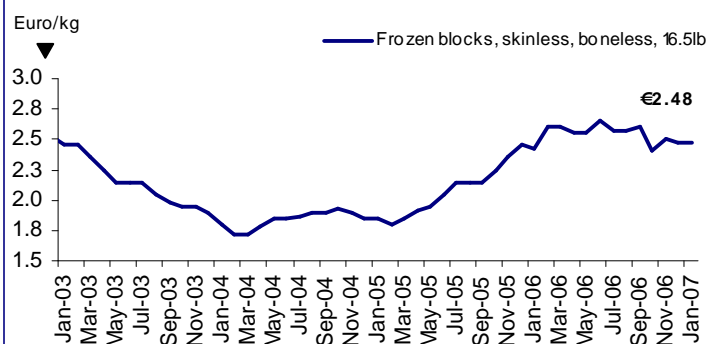

lower. Price indications for frozen South American hake fillets are also largely stable in dollar terms although the price of hake mince of Argentinean origin is showing an upward trend (+6%) compared to December.

Alaska pollack* and Surimi**

*In Europe, origin: USA/Russian Federation; **In France

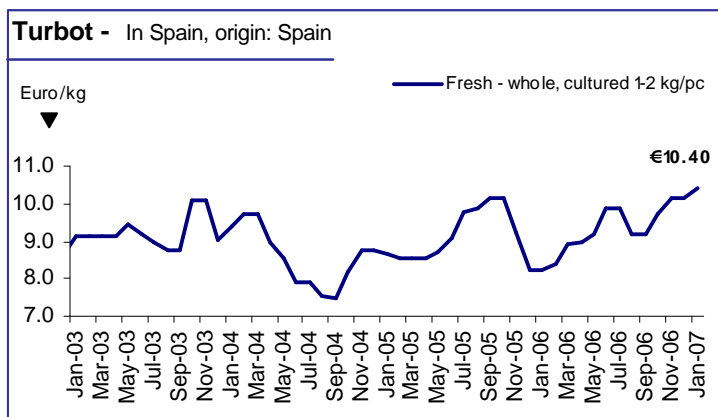

Saithe - In Germany, origin: Norway

Price indications for frozen European groundfish fillets (cod and saithe) are unchanged on December.

FLATFISH

Following good Christmas sales, average prices (cif Spain) for the smaller farmed turbot grades have increased by between 2 and 5% since December. In contrast, prices for the medium to larger grades (2-3/3-4kg) are stable to decreasing as a result of improved supply levels due to better growth rates and, no doubt, to seasonally weaker catering demand for January. With lower wild turbot landings forecast, prices for the larger sizes are

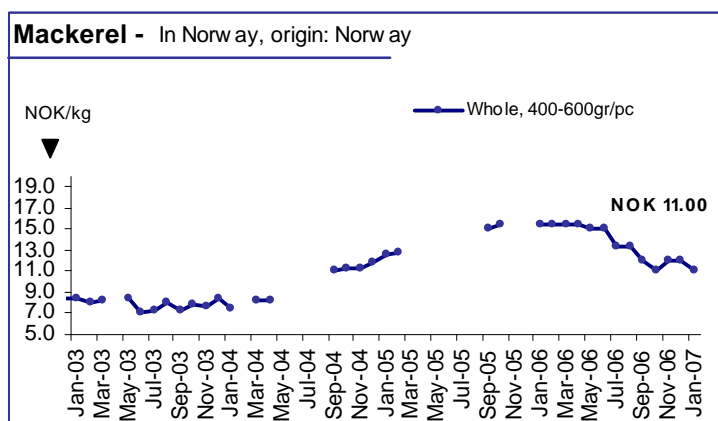

expected to stabilize over the coming weeks.

TUNA

In line with the projections contained in the December 2006 issue of the EPR, the tuna market in January remained consistent with the 2006 trend of low supply and high prices, especially as far as yellowfin was concerned. In the Indian Ocean, the yellowfin fishing season is producing extremely low landings. Catches are also poor in the Eastern Tropical Pacific. As a result of reduced supplies, prices of frozen yellowfin and frozen loins reported several increases. Due to the high yellowfin prices, European canneries are purchasing less raw material and loins for canning, therefore relying mostly on their coldstorage holdings, at least temporarily.

PELAGICS

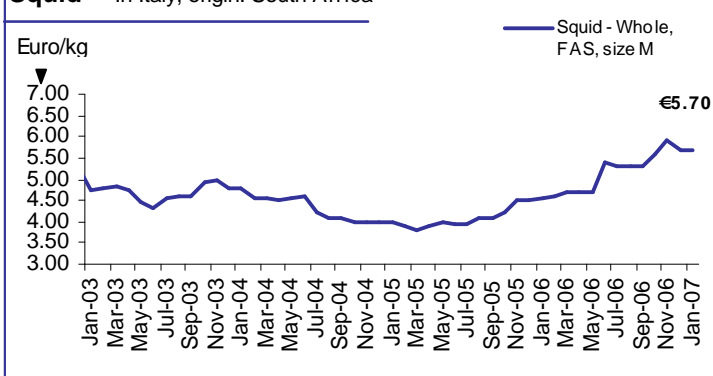

Markets for round mackerel in both Japan and Russia remain quiet with Norwegian fob prices stable to decreasing compared with December. With mackerel demand in general for the 2006/7 season somewhat disappointing, first quarter prices this year are likely to be well down on first quarter 2006 levels particularly for the medium grades (300-500/400-600gr). In contrast, prices for the 600gr+ grade remain firm with prices this month on a par with those during January last year at around Nok20/kg fob.

Although demand for round herring is also seasonally quiet, the upward price trend noted last month has continued into 2007. Indications, cip St. Petersburg, for the 300gr and 350gr grades are up between 4 and 7% in dollar terms compared with December. The price of large flaps (5-8/kg) are up 12% this month.

CEPHALOPODS

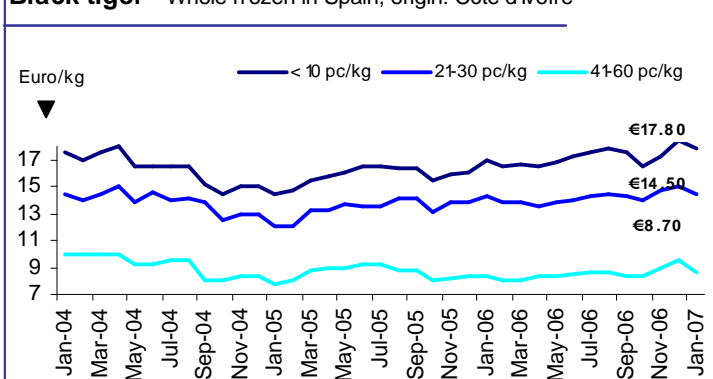

Squid - In Italy, origin: South Africa

Frozen Loligo prices, delivered Spain and Italy, are unchanged on December levels for South African product. Strong demand and weak catch levels have, however, maintained upward pressure on South African prices over the past year and current levels are between 20 and 30% higher than in January 2006.

CRUSTACEANS

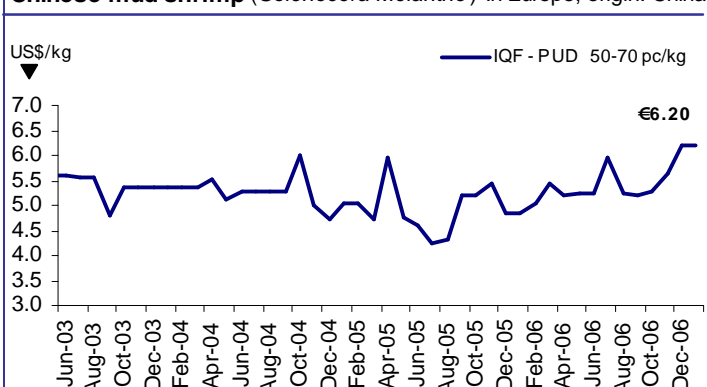

Black tiger - Whole frozen in Spain, origin: Côte d'Ivoire

With some exceptions, trends for frozen shrimp prices in European markets appear broadly stable. Compared to December, prices for farmed *Vannamei* are reported slightly higher while limited supplies are maintaining some upward pressure on black tiger and wild shrimp of Indonesian origin. Prices for wild shrimp from the Côte d'Ivoire, on the other

hand, are lower following increases during the fourth quarter of 2006. In the cold water segment, market resistance and a new duty free EU quota are providing some downward pressure on peeled *Pandalus* prices. Prices are reported stable for shell-on products although weaker supplies are keeping pressure on the larger sizes.

Chinese mud shrimp (*Solenocera Melanthero*)-In Europe, origin: China

SALMON/TROUT

Taking stock of the present situation and the results for 2006, both Norway and Chile, the two largest producers of farmed salmon have fairly good reasons to be satisfied. Norway can look back at a year with export values up 26% to NOK 17.1 billion (2005 NOK 13.5 billion) and average export prices per kilo up 20.8 % from 2005 to NOK 29.82 NOK in 2006. Total export volumes expressed in round weight reached 572 000 tonnes, up 4.3% from 2005.

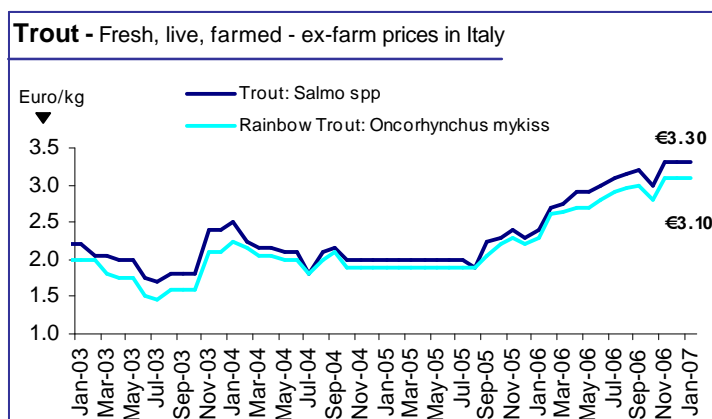

Norwegian salmon farmers are therefore quite happy with the results despite higher costs in 2006 because of rising feed and fuel prices. The higher export prices reflect a good market in 2006 with rising demand in all markets except Japan where Norwegian export volumes fell slightly (although values were up) and to Russia, where fresh

salmon sales have experienced problems due to some still unresolved disagreement with the Russian veterinary authorities.

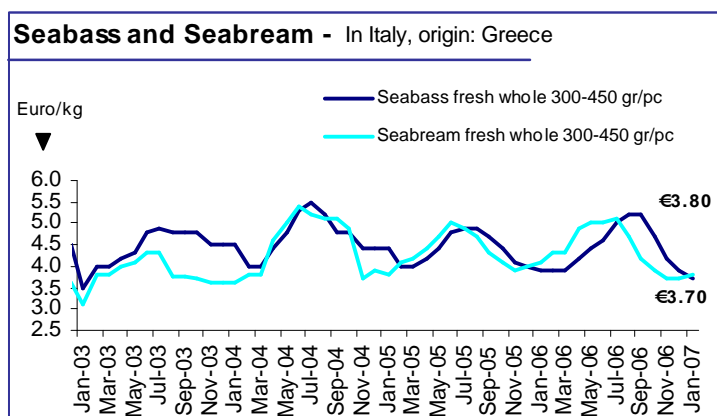

The situation for Chile is a bit different. Salmon production dropped in 2006 for the first time in years by an estimated 20 000 tonnes from 395 000 tonnes in 2005 to a still respectable 375 000 tonnes in 2006. The main reason for this unexpected drop is related to growth problems in the production cycle and a stronger focus on value addition rather than production volume than in Norway.

This is well reflected in Chile's salmon exports to the US in 2006 (11 months), its largest export market besides Japan. Chilean salmon export volumes to US dropped almost 10% to 96 000 tonnes but values were up almost 30 % in the same period reflecting much higher average prices than the previous year.

The outlook for farmed salmon in 2007 is therefore considered to be positive with good underlying demand and no large increases in supply projected for 2007.

SEABASS/SEABREAM

Good demand in December has been followed by more unsettled times in January. Bass prices in particular have dropped this month due to good supplies from both farmers and capture fisheries. Seabream prices on the other hand have risen for the small and portion size categories but for bigger fish above 450 gr prices have dropped for bream as well.

In normal years, prices would be rising for both species from January onwards until the new generation fish reach market size around July-August. This year, although the winter is quite mild all over the Mediterranean, has not resulted in markedly higher water temperatures so growth is not much higher than what is normal. The falling prices are therefore not expected to continue for much longer, and a period of stability and firming of prices should set in soon.

The **European Fish Price Report** is a monthly GLOBEFISH publication, prepared by Karine Boisset and Gerry O'Sullivan, based on information supplied by industry correspondents.

It can be ordered from the **FISH INFONetwork**:
